

The conference venue is located at the Royal Institute of Technology, Stockholm.

More about the conference can be found on the conference website
<http://www.stimdi.se/konf/nordichi2000/>

Welcome to NordiCHI2000!

We are very happy to be the organisers of the very first NordiCHI conference. It is a thrilling experience, not knowing how things will turn out in the end. We anticipated about 200 delegates and already three weeks before the conference 350 participants had registered! Rooms have to be changed and the conference dinner needed a larger place to have room for all of us.

We cordially invite you to the first Nordic Conference on Human-Computer Interaction, held at the Royal Institute of Technology in Stockholm, Sweden, on October 23 -25th 2000. The conference is open to all participants. The conference theme: “Design versus Design “ alludes to the traditional Scandinavian Design tradition, as well as the Scandinavian approach to software design.

From 103 submissions the program committee selected 21 full paper presentations, 24 short paper presentations, 8 demonstrations and 8 posters from authors from all over the world. The program also includes 4 keynote addresses, a doctoral consortium, 5 tutorials and 3 workshops.

The conference is organised by STIMDI (the Swedish Interdisciplinary Interest Group for Human Computer Interaction) in co-operation with HCI organisations from the other Nordic countries. The Association of Computing Machinery (ACM) financially supports the conference, something that we are much obliged to.

We are very happy to see you in the lovely city of Stockholm and at our conference, which promises to be very interesting for both HCI practitioners and researchers.

We hope you will enjoy this first NordiCHI conference and that we all can look forward to many new following NordiCHI conferences.

Jan Gulliksen (general chair of NordiCHI 2000 and chairman of STIMDI)

Ann Lantz (co-chair of NordiCHI 2000)
